

Green Project Coordination

In an era defined by climate urgency and a global push for sustainability, professionals must do more than adapt—they must lead. The **Green Project Coordination (GPC)** is designed for change-makers who are ready to reimagine how projects are designed, funded, and executed in alignment with environmental responsibility and innovation.

This course empowers learners to lead the shift toward a greener future by equipping them with the essential tools to **plan, evaluate, and implement impactful green projects**. You'll explore the methods and frameworks used by leading global initiatives—like B Corp, CDP, and the UN SDGs—to transform environmental vision into actionable strategies.

Whether you're an experienced professional, an aspiring sustainability leader, or simply passionate about building a better world, this course will give you the practical knowledge and confidence to contribute meaningfully to the green economy.

What Will You Learn?

Participants will gain practical, job-ready knowledge and skills, enabling them to:

- **Define** Green Project Coordination and its relevance across sectors.
- **Explain** the role of green projects in relation to financing, funding, and eligibility—especially through policies and legislation that support environmentally focused initiatives.
- **Identify** the importance of green projects across industries including energy, construction, and community development.
- **Map stakeholders** involved in each project stage and gain insight into their roles.
- **Evaluate** green projects using critical path models to ensure timely and strategic execution.
- **Navigate** Canada's regulatory frameworks to classify and validate projects as "green."
- **Apply** environmental standards and ensure compliance with relevant legislation.

Who Should Take This Course?

This course is ideal for:

- **Project Managers** and professionals responsible for planning or overseeing sustainability projects.
- **Mid-level and Senior Managers** seeking to integrate sustainable practices into their organizational strategies.
- **Oil & Gas professionals, entrepreneurs, and recent graduates** exploring energy transition and green technology opportunities.
- **Community leaders and concerned citizens** who want to drive positive change through local or regional green initiatives.

Recommended: Secondary school completion or equivalent, university-level English proficiency. 2–5 years of work experience is helpful but not mandatory.

How Will You Benefit?

By completing this micro-credential course, you will:

- Be able to **apply international green project frameworks** to develop funding proposals aligned with major sustainability goals.
- **Create a project proposal** modeled after successful **Natural Resources Canada (NRC)** calls for climate action, clean tech, low-carbon economy, and infrastructure.
- Develop a **comprehensive plan** with implementation strategies and measurable outcomes based on real-world environmental standards.
- Be **recognized as a professional** who not only understands green innovation—but can lead it.

Fees & Scheduling

Course Structure, Fees & Scheduling

- **Format:** 100% Online, Self-Paced
- **Duration:** Up to 6 months from your chosen start date
- **Modules:** Four practical and engaging learning modules (listed below)
- **Access:** Includes pre-recorded video lessons and email consultation with the instructor
- **Fee:** To be determined

Course Modules

1. Introduction to Green Project Coordination
2. Green Project Funding, Policy & Regulatory Contexts
3. Stakeholder Engagement & Project Planning Tools
